Subject:	***Acton Required- Decision needed to make progress on Holiday Scents product***

Hello,

I hope you are doing well. My name is Ryan and I have been managing our Holiday Scents product line, which is scheduled to launch in October.

Problem-I would like to bring an issue to your attention. Our team has begun sending out test shipments to customers and so far drivers have only delivered 80% of the plants successfully. The team needs to raise the on time delivery rate to at least 90% to avoid sending out the next batch late.

Consequences -This has created customers not being satisfied and some already canceling subscriptions. A delay can cause even more issues setting back the project timeline, risking product quality and hurting revenue.

Course of action and make request - I am requesting that the Director of Operations, HR Specialist, the Senior VIce President of Human Resources, and the Director of Product read and discuss the following with myself and stakeholders as I have several ideas to improve future delivery rates.
